In re the Application of

Inventor: A.G.E. Von Elbwart

Art Unit: 2195

Appln. No.: 10/594,566

Exr. W. Huaracha

Filed: October 1, 2007

Conf. No. 5590

For: A METHOD AND SCHEDULER FOR PERFORMING A SCHEDULING
ALGORITHM WITH MINIMUM RESOURCE PARAMETERAGENDA FOR TELEPHONE INTERVIEW

Dear Examiner Huaracha:

In preparation for the telephone interview scheduled for Thursday, May 12, 2011 at 11:00
a.m., the following agenda is respectfully submitted:

AGENDA ITEMS

1. 35 U.S.C. §101 rejections
2. 35 U.S.C. §102 rejection of claim 23 based on Klein (US 20040053574 A1) -

Independent claim 23 currently recites:

“23. A method for performing a scheduling algorithm with minimum resource scheduling in a mobile communication system, comprising:

scheduling allocation units for a user or service on a per-scheduling frame basis, wherein each scheduling frame comprises a plurality of allocation units,

checking whether the allocation units that are scheduled for the user or service in a current scheduling frame meet at least one resource constraint,

releasing the allocation units that are scheduled for the user or service for said current scheduling frame in response to a result of checking whether the allocation units that are scheduled for the user or service in said current scheduling frame meet the at least one resource constraint, and

re-scheduling the released allocation units in the current scheduling frame to at least one other user or service.”

The Applicants disagree that Klein discloses the above-emphasized features of claim 23, and would like to discuss this issue.

3. Discussion of any other issues.

Respectfully submitted,

Date: May 11, 2011
